KAPOK COTTON PILLOWS

A PLANT FIBRE FILL

PROPERTY OF ZERO CARBON INNOVATION INC · NOT FOR CIRCULATION

THE FIBRE

Lifted from the pod.

Kapok is a plant fibre taken from the seed pod. It is carried as the natural alternative to a feather fill.

The fibre is light and the fill is soft. It is stated as a material and a construction, with no support rating and no health claim.

Cover construction and fill weight are set against a buyer's own specification.

Kapok fill interior.

HOW THE RANGE IS QUOTED

Concept to delivery.

SPECIFICATION

A buyer brings a size chart, a fill preference and a cover construction. ZER0 returns a costed specification against them.

SOURCING

Cover and fill are separate supply decisions and are quoted separately.

SAMPLING

Fit and finish are proved on a sample before bulk, in the same stages the apparel categories use.

COMPLIANCE

Stated against the buyer's own programme. ZER0 states no certification of its own in this document.
